Topic: RAB

Program BASE

Site:

Presentor EnSafe
Anderson

Actions/Decisions:

Reviewed the active project summary.

SWMU 22 - EPA and TDEC discussed handling the petroleum contamination beneath building S-75 as a petroleum site and not a SWMU. The contamination will be addressed following demolition of building S-75.

Statement of basis - Recent SWMU 27 events need to be added to the SB.

An overview of the results from the August 2001 long-term monitoring event were presented. In general, the results are consistent with historical results with exception to the A-A pilot study area wells. Most of these wells displayed a decrease in TCE concentrations and an increase in cis-DCE concentrations.

The next BCT meeting is scheduled for Tuesday, December 4, 2001 beginning at 08:00 cst. A pre-RAB brief of the CO will be at 11:00, and the RAB meeting will be at 18:30.

RAB agenda items include: SWMU 2 and SWMU 27 updates, Parsons report of the vegetable oil study, BRAC and ERNA updates, Navy exchange update.

BCT agenda items include all RAB agenda items and: active project summary, SBs, pre-RAB brief, EI, possible installation of utilities by the MIDB near SWMU areas.
